ABOUT ME

A motivated Computer Engineering graduate with a strong interest in backend development, cloud computing, and DevOps. Passionate about building scalable backend systems, working with cloud-native technologies, and improving system performance and reliability. Eager to apply my skills to real-world projects, contribute to impactful solutions, and continue growing in a collaborative and dynamic environment.

EDUCATION

B.Sc. Eng Hons Computer Engineering

Jaffna, Sri Lanka

University of Jaffna – GPA: 3.6/4.00

Apr 2021 – Nov 2025

- **Relevant Coursework:** Data Structures and Algorithms, Database Systems, Introduction to Artificial Intelligence, Networking, Digital Design, Programming Languages, Introduction to Data Science, Advanced Machine Learning, Natural Language Processing, Deep Neural Networks, Embedded Systems.

BT/St.Cecilia's Girls' College

Batticaloa, Sri Lanka

G.C.E Advanced Level : Combined Maths: A, Physics: B, Chemistry: B (Z-score: 1.56)

Jan 2017 – Aug 2019

EXPERIENCE

Software Engineering Intern

Feb 2025 – Aug 2025

WSO2 Lanka (Pvt) Ltd

Colombo 04, Sri Lanka

- Developed an end-to-end role-based insurance portal with a React (TypeScript) frontend and WSO2 backend services.
- Integrated the **WSO2 stack** for enterprise security, API management, and service orchestration.
- Configured **WSO2 Identity Server** for role-based access control (Customers, Employees, Administrators) using OIDC.
- Built secure **RESTful backend** services with MySQL and containerized them using **Docker** for simplified deployment and scalability.
- Contributed to the **Solution Architecture team** by developing a reusable proof of concept (POC) in the insurance domain.

TECHNICAL SKILLS

- **Languages:** JAVA, Python, C++, JavaScript, MATLAB, Bash
- **Software Development:** Spring Boot, React, Node.js, Flask, HTML, CSS
- **Developer Tools:** Linux, Git, Docker, VS Code, IntelliJ, Postman, Rancher Desktop, WSO2 Stack (API Manager, Identity Server, Micro Integrator)
- **Cloud & DevOps:** AWS (Lambda, API Gateway, DynamoDB, RDS, S3, CloudFront, IAM, Elastic Beanstalk, ECR, EKS)
- **Data Science:** PyTorch, scikit-learn, Pandas, NumPy, Machine Learning, Computer Vision

RESEARCH

Efficiency of using binary gene expression data in lung cancer subgrouping: A machine learning study

Python, Scikit-Learn, Pandas, Mutual Information, Gaussian Mixture Models

2024 – 2025

- Conducted a comparative study using the GSE135304 gene expression dataset to evaluate binary vs. continuous data for NSCLC subgroup classification.
- Implemented Adaptive Binarization using Gaussian Mixture Models (GMM) and applied Mutual Information (MI) for high-impact feature selection.
- Developed and evaluated six ML models (SVM, Random Forest, KNN, Logistic Regression, Naïve Bayes, Decision Tree) with cross-validation.
- Achieved 80% accuracy using SVM on binarized data, outperforming continuous data models (77%).
- Reduced computation time and memory usage through GMM binarization.

PROJECTS

Event RSVP Application ☑ | *AWS Lambda, API Gateway, DynamoDB, RDS, S3, CloudFront, IAM* 2025

- Built a fully serverless AWS application using Lambda, API Gateway, DynamoDB, RDS, S3, and CloudFront with secure IAM configurations.
- Designed scalable REST APIs and implemented global CDN-backed frontend hosting for high availability and low latency.

Salon Appointment Booking System ☑ | *Spring Boot, React, Keycloak, RabbitMQ, Docker* Ongoing

- Built a microservices-based salon booking system using Spring Boot with secure authentication and role-based access control via Keycloak and JWT.
- Integrated RabbitMQ for asynchronous inter-service communication and WebSocket for real-time booking notifications.
- Designed RESTful APIs for booking and salon management, and containerized services using Docker for scalable deployment.

Computer Lab-2 Booking System - Web Application ☑ | *React, Node.js, Spring Boot* Aug – Dec 2023

- Developed real-time lab availability with an interactive calendar interface for viewing and booking open time slots, enabling role-based access for students, faculty, and staff.
- Built booking management features for creating, viewing, and canceling reservations with automated email notifications.
- Created an admin dashboard for managing bookings, resolving scheduling conflicts, and monitoring lab usage statistics.

Cloud Native Monitoring Application ☑ | *Python, Flask, Docker, K8s, AWS* 2024

- Developed a Flask-based Python monitoring application, containerized it with Docker, and stored images in AWS ECR.
- Deployed the application on an AWS EKS cluster using Kubernetes Deployments and Services for scalable cloud-native operation.

CERTIFICATIONS

- WSO2 Micro Integrator Practitioner V4
- WSO2 Identity Server Practitioner – V7.0
- WSO2 API Manager Practitioner - V4
- Introduction to DevOps (Great Learning)
- Network Basics
- GitHub Actions
- Foundations of User Experience (UX) Design (Coursera)
- Python Basics for Data Science (edX)
- Hands-on Introduction to Linux Commands and Shell Scripting (Coursera)
- Introduction to Cybersecurity
- Introduction to IoT and Digital Transformation

VOLUNTEERING

Webmaster 2023 – 2025

IEEE Robotics Automation Society Student Chapter - University of Jaffna

Organizing Committee 2021 – 2022

Rotaract club, Faculty of Engineering - University of Jaffna

COMPETITIONS

- CodeStrom Hackathon, 2024
- XTREAME ENCODE, 2024
- Devthon 1.0, 2024
- ACES Hackathon, 2024
- Predicta 1.0, 2024
- IEEEEXTREAM, 2023 & 2024

SOFT SKILLS & STRENGTHS

- Leadership, Communication, Teamwork, Flexibility, Problem Solving, Critical Thinking, Responsibility, Motivation

LANGUAGES

- English (Professional), Tamil (Native), Sinhala (Elementary)
